THE GENESIS

Shyam Sundar Society of Education (SSoE) was started as an Activist Organization during the year 2022 (established on Dt.13.01.2022), which tried to visualize the problems of locality feelings of people at micro level & raise voice for people. But in due course of time, the spirit of activism got overshadowed by the harsh reality of people's minimum materialistic gain that essentially ensures one's own survival. Witnessing the first changes and the aftermath of changing attitudes, there arised need for a change in operational modalities to emphasize more on developmental aspects.

By the way, retaining original broader attitude of "Serving People's Purpose" – the eventual metamorphose took place in the organization to transform that basically and integrally as a "Voluntary Development Organization" to cater to macro level & give specific, integrated approach to developmental activities from scattered welfare approach.

OPERATIONAL AREA:

Entire Odisha

STATUS OF OPERATIONAL AREA:

It is an open fact that the operational area is quite an underdeveloped area characterized by majority of prominent features of underdevelopment like poverty, inaccessibility, economic backwardness, lack of employment opportunity, illiteracy, distress sale of human labour and agricultural produces, health hazard and migration etc.

In particular, it is a fact that the abject poverty is prominent feature of majority of the operational areas. Though agriculture is the major stay of life (71.82%) for majority of people they are most disturbed by recurrence of disasters like flood, cyclone, drought, landslides etc.

Due to burden of indebtedness and oppression of moneylenders, people are bound to resort to migration to various states. Education & health services are too poor in these operational areas primarily due to demographical constraints, illiteracy and lack of information & infrastructure as well as proper media of communication - especially road, telecom etc. eventually remains the most prominent.

The intervention in some remote most and hard to reach areas has been incepted this year with the primary efforts of community organization & some of the base line data collection about the life and livelihood resource management aspects of people living in those areas. Task based intervention will be taken up in following years.
